The Sound Compression Library M3S-SEN-Tiny Revised to V.1.00 Release 01

We have revised the sound compression library M3S-SEN-Tiny from V.1.00 Release 00 to V.1.00 Release 01. The revised product is available free of charge.

1. Description of Revision

The V.1.00 Release 01 product supports the H8/300H Tiny series, H8 family and the M16C/Tiny series, M16C family of MCUs in addition to the R8C family, which the previous version already supported.

2. Overview of the Product

M3S-SEN-Tiny is a sound compression software library, enabling you to introduce sound compression functionality in your systems designed with the R8C family; the H8/300H Tiny series, H8 family; and the M16C/Tiny series, M16C family of MCUs.

The compressed sound data can be expanded by using the expansion library of the sound playback system M3S-S2-Tiny or the PC Tool expansion utility.

So using this library with a sound playback system allows you to easily configure sound recording and playback functionality in your application systems.

For details of M3S-SEN-Tiny and M3S-S2-Tiny, go to:
