A T-Engine Development Kit R0P751RTH002TRK for the SH7751R Group MCU (SuperH RISC engine family) to Be Published

We are publishing a T-Engine development kit R0P751RTH002TRK for the SH7751R Group MCU (SuperH RISC engine family) on February 6, 2006.

1. **Descriptions**

   We have discontinued the production of the T-Engine development kit for the SH7751R Group MCU, R0P751RTH001TRK, and are publishing its successor R0P751RTH002TRK. For details of the R0P751RTH002TRK, see its datasheets.

   1.1 Difference between R0P751RTH001TRK and R0P751RTH002TRK
   The LCD board module has been re-designed in the successor.
   Because changes have been made only to some parts on the board, the functionality of the successor is the same as that of the predecessor.

   1.2 Software Compatibility with R0P751RTH001TRK
   Software compatibility is kept between R0P751RTH001TRK and R0P751RTH002TRK because the successor comes with the LCD driver providing the same application interfaces as the predecessor.

2. **How to Purchase the Product**

   If you place an order for the product, please supply the following items of information to your local Renesas Technology sales office or distributor (for the price of the product, also contact them):

Product Type	SH7751R T-Engine development kit
Type Name	R0P751RTH002TRK

NOTICE: Since the product is the equivalent of its
predecessor, upgrade of the product or replacement
of any parts are not available.
