Three MCU Groups Newly Supported by the Compact Emulator R0E436640CPE00 for the H8/300H Tiny MCU Series

The H8/36077, H8/36079, and H8/36094 MCU groups have become newly supported by the compact emulator R0E436640CPE00 for the H8/300H Tiny MCU series.

1. Description

All the members of the H8/36077, H8/36079, and H8/36094 MCU groups have been added to the support line of the R0E436640CPE00 emulator.

To emulate members of these three groups, you need to obtain the MCU and IO files for each of the groups (files containing information specific to the MCU group).

For how to obtain these files, see Section 2 below.

2. How to Obtain Necessary MCU and IO Files

To obtain the MCU and IO files necessary to the above MCU groups, download the update program

"R0E436640CPE00_MCU_File_Updater_20070301.exe"

free of charge from the Web page

and execute it (available on and after March 20).

Then follow the instructions to update your existing MCU and IO files.

The necessary files will be added.

The MCU and IO files necessary to emulate members of the three groups are as follows:

Group	MCU File	IO File
H8/36077	H836077.mcu	H836077.io
H8/36079	H836079.mcu	H836079.io
H8/36094	H836094.mcu	H83694f.io*

*The same as the IO file for the H8/3694 group
