Programming GUI "FP6 Terminal"

for PG-FP6 Flash Memory Programmer V1.03.00

---

## Outline

We have updated the "FP6 Terminal" programming GUI for the PG-FP6 flash memory programmer from V1.02.01 to V1.03.00. For an overview of the PG-FP6, refer to the URL below.

## 1. Description of Update

### 1.1 Addition of Supported MCUs

Support has been added for the following MCUs.

#### (1) Renesas Synergy MCUs

Group	Part number
S5D3	R7FS5D37A

#### (2) Power Management

Group	Part number
Battery Management	RAJ240047, RAJ240071, RAJ240075

#### (3) Renesas USB Power Delivery Family

Group	Part number
C30	R9J02G012

(4) 78K Family

Group	Part number
78K0/LC3	UPD78F0400, UPD78F0401, UPD78F0402, UPD78F0410, UPD78F0411, UPD78F0412
78K0/LD3	UPD78F0420, UPD78F0421, UPD78F0422, UPD78F0430, UPD78F0431, UPD78F0432

## 1.2 New Features

We have added/improved the following features.

### (1) Addition of gang programming function

A new Programming GUI “FP6 Gang Programmer,” which enables simultaneous programming using multiple PG-PF6s, has been added to the Programming GUI “FP6 Terminal.” You can operate multiple PG-FP6s to program multiple target MCUs simultaneously.

- Control up to 12 PG-FP6s from one PC for simultaneous programming, thereby reducing time for high-volume programming.
- Easy setup by downloading a set of setting file and program file to multiple PG-FP6s at once.
- GUI panel where you can see programming status and pass/error of each PG-FP6.

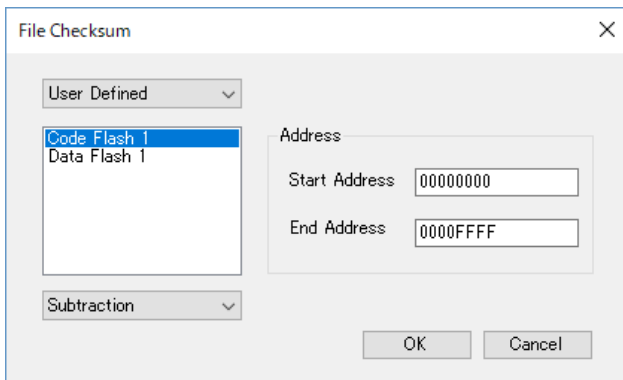

### (2) Improvement of Read function

In addition to the existing function for reading all flash memory areas, you can now read flash memory of the specified address range by using the following dialog box.

(3) Improvement of File Checksum function

In addition to the existing function for calculating the file checksum of all flash area, it is now possible to specify address range and calculation method for calculating the checksum by using the following dialog box.

(4) Improvement of Upload Files function

In addition to selecting the folder in which a program file is saved, you can now specify a file format and file name of the upload file.

(5) Other improvements

- The [Import Setup File] and [Open Setup File] menus have been integrated into [Open Setting File].
- A function for supplying clocks to the target MCU from the PG-FP6 has been added.
- A function for clearing the console window and status bar on the GUI and the status LED on the main unit has been added.
- A function for not deleting the programming area before downloading a program file has been added.

1.3 Items Revised

The following point for caution has been corrected.
