Outline

QE for Capacitive Touch, the development assistance tool for capacitive touch sensors, has been updated from V3.0.2 to V3.1.0.

1. Description

1.1 Improved Functionality

- CTSU2SL touch IP support
  CTSU2SL touch IP is supported. RX140 group MCUs, which are equipped with the CTSU2SL touch IP, and whose ROM size is 128 KB or 256 KB, can be used in the product.

- Fixed the problem with recording gestures
  Applicable devices: RA2L1, RX231, RX140, RX671
  When the user tries to record gestures in V3.0.1 and V3.0.2, the recording process does not start. This problem has been fixed in V3.1.0.
  On the [Create Data List] dialog box, click on the [Start Recording Gesture] button to open the [Recording Your Gesture] dialog box. You can record gestures from there.

For details of the update and how to install the product, refer to the release note at the link below.

- QE for Capacitive Touch V3.1.0 Release Note
  [Link to release note]
2. Operating Environment

- Integrated development environment e² studio 2022-04 or later
  For how to use the product, select [Help] in e² studio and refer to QE.

3. Obtaining the Product

Download the installer for QE for Capacitive Touch V3.1.0 from the link below.
