RENESAS Tool News

Renesas Flash Programmer Revised to V2.01.01

We have revised Renesas Flash Programmer from V2.01.00 to V2.01.01.
For an overview of this flash-memory-programming software tool, go to:
https://www.renesas.com/rfp
The above URL is one of our global sites.

1. Descriptions of Revision

1.1 Device Support

The following MCUs have been added to the support line:

(1) In RX family
R5F5111J, R5F51111, R5F51113, R5F51114, and R5F51115 (RX111 group)

(2) In V850 family
UPD70F4177, UPD70F4178, UPD70F4179, and UPD70F4180 (V850E2/Fx4-G)

1.2 Function Added

When using RX100 series, Renesas Flash Programmer became applicable
to the programming function via the FINE port on your target MCU
and E1 or E20 emulator.

1.3 Problem Fixed

The problem with starting Renesas Flash Programmer after double clicking
a workspace file has been fixed.

Product Versions Concerned:
Renesas Flash Programmer V2.01.00

Description:
On the host PC Renesas Flash Programmer V2.01.00 was installed after
the installation of Renesas Flash Programmer V2.00.00 or V2.00.01;
if you double click a workspace file to boot Renesas Flash Programmer,
the main window of Renesas Flash Programmer V2.00.00 or V2.00.01 is
opened instead of the window of Renesas Flash Programmer V2.01.00
(the version that is last installed.)

2. Updating Your Product

Online update is available free of charge. Download the installer of the product from:

https://www.renesas.com/rfp_download
The installer will be published on this site on June 28, 2013.
The above URL is one of our global sites.

3. How to Purchase the Product
