

PRODUCT CHANGE NOTICE

Shipping Tube Change for Intersil MSOP Packaged Products

**Refer to:
PCN11059**

Date: June 17, 2011

June 17, 2011

To: Our Valued Intersil Customers

Subject: **Shipping Tube Change for Intersil MSOP Packaged Products**

This notice is to inform you that Intersil is changing the anti-static tube used for packing/shipping of MSOP (Mini Small Outline Plastic) packaged products from the Carsem, STATS ChipPAC, and Unisem facilities located in Malaysia. The change from a round profile (current) tube to a rectangular / square profile (new) tube will eliminate lead contact with the tube body thereby reducing the potential for bent leads.

Round Profile Tube

Rectangular / Square Profile Tube

The industry standard tubes are made of an anti-static material. There will be no change in tube length or the quantity of units packed in a tube. Dimensional information and drawings of each type are included on the next page for reference.

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products. Customers may expect to receive shipments of product from the Carsem, STATS ChipPAC, and Unisem facilities packed in the new anti-static tubes beginning ninety days from the date of this notification or upon depletion of existing inventory.

If you have concerns with this advisory, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jon Brewster
